DAY TO NIGHT

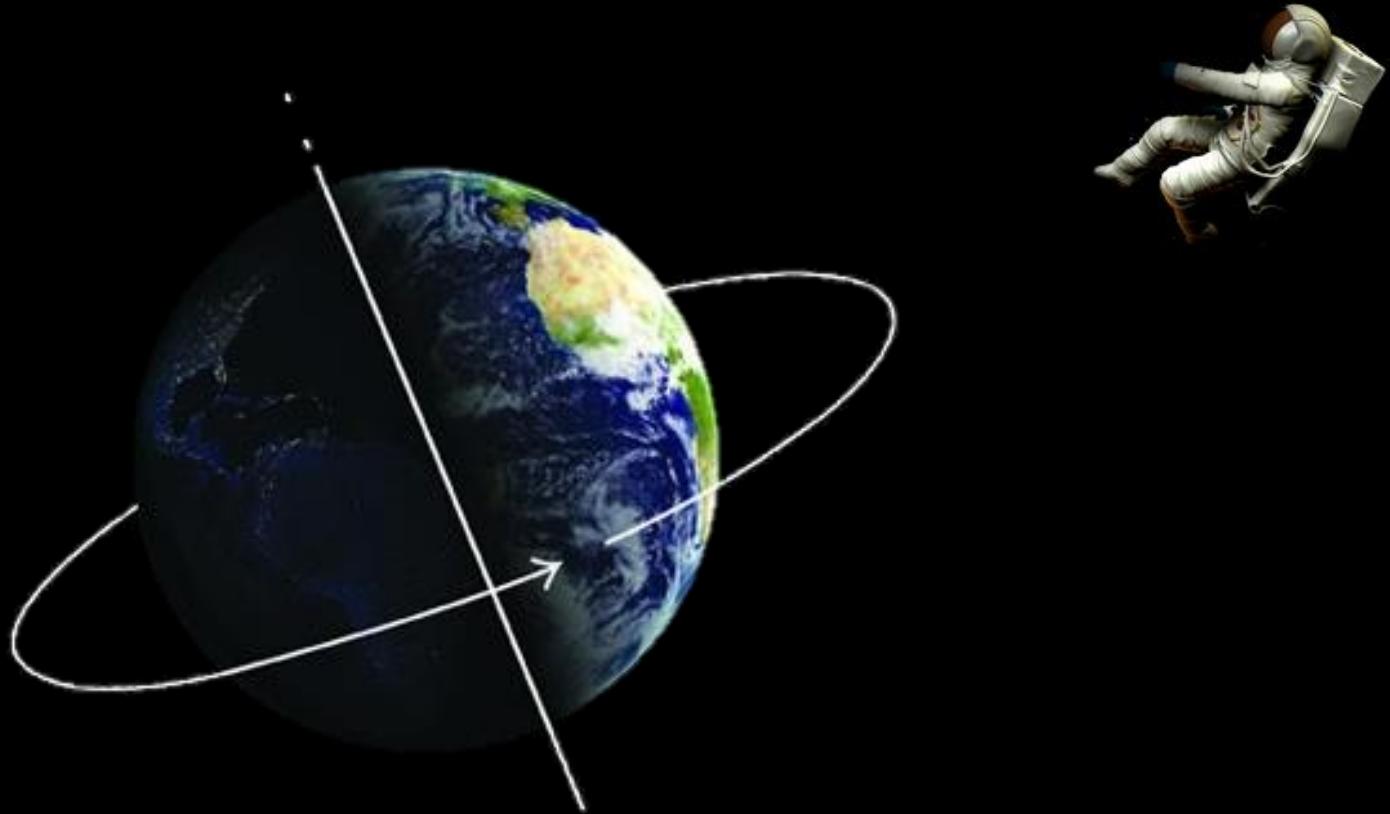

https://drive.google.com/file/d/1Rzckj3i3AtTL94_iojmlkFM74I3X2LD4/view?usp=sharing

We get **DAY** and **NIGHT** because
the Earth rotates.

Tenim dia i nit perquè la **TERRA** gira sobre si mateixa .

It takes 24 HOURS for the EARTH to
turn all the way around.

La TERRA triga 24 HORAS a girar sobre ella mateixa.

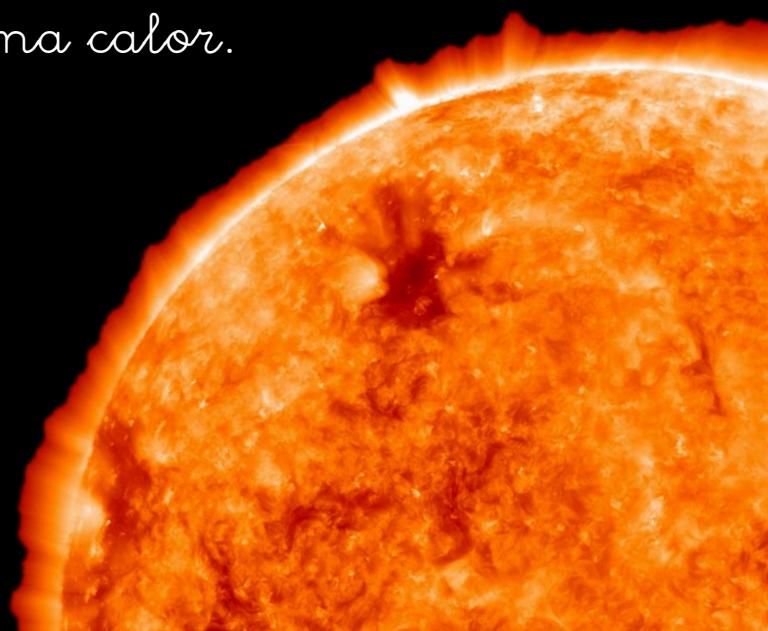

In the **DAYTIME** you can see
the **SUN** and **CLOUDS**.

Durant el **DIA** pots veure el **SOL** i **NÚVOLS**.

The SUN :

- Is a STAR. És una estrella.
- Gives us LIGHT. Ens dóna llum.
- Gives us HEAT. Ens dóna calor.

At NIGHT you can see the MOON and STARS.

Durant la NIT pots veure la LLUNA i ESTRELLES.

The MOON:

- Is a SATELLITE. És un satèl·lit.
- Travels around the EARTH.
Viatja al voltant de la Terra.
- The LIGHT from the SUN helps
the MOON shine.
La llum del SOL ajuda a la LLUNA brillar.

TASK

1. Watch and read the story.

NAME / Nom:

THE EARTH AND THE SUN

The EARTH moves around the SUN.

1. Colour the Sun and the Earth.
2. Draw a line to show how the Earth orbits around the Sun:
